

PRAVINKUMAR SUBBU SING

FRONTEND ENGINEER

Dubai, United Arab Emirates | pravinkumars536@outlook.com | +971 58 541 6075 | [LinkedIn](#)

Personal Details:

Indian | 28 March, 1994

PROFILE

Front-end engineer with 9 years of experience designing and delivering responsive, accessible web applications. Skilled at improving performance and usability through clean, maintainable code, close collaboration with design and backend teams, and rapid adoption of new tools to consistently deliver high-quality, on-time releases.

PROFESSIONAL EXPERIENCE

Senior Consultant, Emirates National Bank of Dubai (ENBD)

Jan 2022 to Present

Dubai, United Arab Emirates

Overview

Front-end engineer responsible for designing and delivering modular, accessible React/TypeScript applications used across customer onboarding and marketing channels.

Key projects

- **Credit Card Onboarding Platform (CCSTP):** Led front-end design and implementation for an end-to-end onboarding flow—built reusable component library, form validation and verification flows, and integrations with identity and document services.
- **ENBD Lifestyle & Deals:** Implemented a responsive web experience and native webview integration to support marketing campaigns and promotional partnerships.

Impact & responsibilities

- Defined front-end architecture and component standards to ensure consistency, reuse, and maintainability across applications.
- Optimized performance through code-splitting, lazy loading, and asset optimization to improve perceived load times and conversion on key forms.
- Led accessibility improvements (WCAG) and introduced automated end-to-end and unit testing (Playwright, Jest) to raise reliability and reduce regressions.
- Collaborated with backend teams to design efficient API contracts and implement client-side caching and incremental data fetching to lower network usage.
- Established CI/CD pipelines and code review practices, accelerating release cadence and improving release quality.
- Mentored junior engineers, conducted design reviews, and onboarded new team members to elevate team productivity and code quality.

Consultant Technology, Virtusa consulting Private Limited

Jan 2020 to Dec 2021

Chennai, India

Front-end developer on the FUZE platform, building solutions to simplify enterprise communications and collaboration.

- Developed responsive web pages and reusable components using React, HTML5, and Bootstrap as part of multiple cross-functional Scrum teams.
- Implemented UI features supporting ETL workflows and integrated front-end interfaces with SQL-based upload/download processes.
- Documented and shared design and development patterns to streamline handoffs and reduce rework across teams.
- Participated in sprint planning, code reviews, and issue triage to support steady, reliable releases.

Software Engineer, HCL Technologies Limited

Aug 2015 to Dec 2019

Chennai, India

Front-end engineer on Cisco Prime Infrastructure and DNAC projects, delivering management interfaces for converged wired and wireless networks.

- Developed and maintained web UIs using HTML5, CSS3, JavaScript, and frameworks including React and AngularJS.
- Implemented client-side integrations to consume JSON and XML APIs and improve data-driven UI workflows.
- Resolved browser compatibility and performance issues, improving cross-platform stability for enterprise deployments.
- Collaborated with QA and backend teams to troubleshoot defects and streamline release processes.
